Block

The BLOCK counter refrigerated showcase with a built-in unit is ideal for the presentation and sale of refrigerated products. The BLOCK remote version has the unit located outside at a maximum distance of 2 meters from the showcase. The display case is connected to the aggregate unit by thermoplastic hoses and quick couplings, which enable quick connection without the need to contact specialized refrigeration companies. Another great advantage is greater flexibility when placing the unit in the space under the display case and the ability to disconnect and reconnect this display case at any time. It is important to place the aggregate unit in a sufficiently ventilated area so that the efficiency of the cooling system and the lifetime of the aggregate are not reduced.

- Double outer tempered glass
- Tempered glass shelves
- Stainless steel design
- LED lighting

Technical details:

- Static cooling, electronic control unit

- Electric voltage 230V/50Hz
- Automatic defrosting and evaporation
- Rear sliding door
- Refrigerant R290

Versions:

Serve over – front insulating double glass (removable KIT)

Self-service – front hinged plexiglass, sliding or wing doors (all as a removable KIT)
